

AMENDMENTS TO THE CLAIMS:

Please replace the claims with the claims provided in the listing below wherein status, amendments, additions and cancellations are indicated.

1. (Original) A coating composition comprising the following (A) to (D) components:

- (A) component: a polycarbonate diol;
- (B) component: colloidal particles of a metal oxide;
- (C) component: a hydrolysate of an organosilane; and
- (D) component: a solvent.

2. (Currently Amended) The coating composition according to Claim 1, being characterized in that wherein the (B) component comprises colloidal particles of oxides of one or two or more types of metals selected from the group consisting of tin, titanium, zirconium, antimony and silicon.

3. (Currently Amended) The coating composition according to Claim 1 or 2, being characterized in that an wherein the amount of the (A) component is in the range of from 0.1% by weight to 7% by weight.

4. (Currently Amended) A resin product having a light transmitting property, being characterized in that wherein a resin substrate is applied with a cured

F-8697

film by the coating composition according to any one of ~~Claims~~ Claim 1 [[to 3]] or 2.

5. (Currently Amended) The resin product having the light transmitting property according to Claim 4, ~~being characterized in that~~ wherein the resin substrate is a polycarbonate resin.
